

# STRETCH CEILING

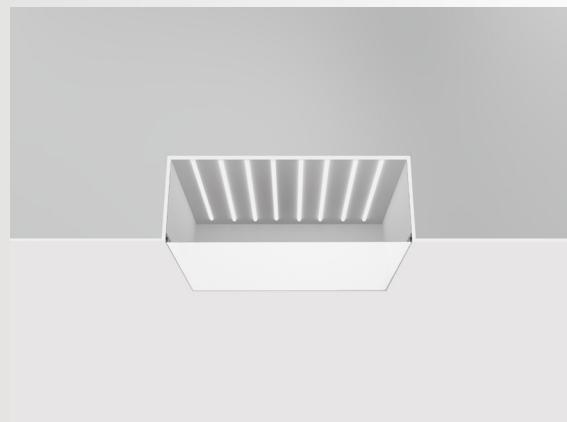

## Designed by

Enrique Ferrer Plaza

## Description

Custom-made luminaire with the capacity to adapt to small and large formats. Backlighting with LED technology. Easy integration in walls and ceilings, with the possibility of adapting to different shapes: straight, curved, etc. Adapts very well to any type of space, such as: homes, offices, hotels, restaurants, etc.

It provides uniform ambient lighting with good visual comfort, creating a skylight effect.
